

Parks and Recreation Services

Parks and recreation centers can help define the quality of life in every setting, whether it's a campus, community or even an entire region. Through innovative and artistic design solutions, Woolpert creates connections between users, spectators and the environment in which they play. With decades of parks and recreation experience across the country, Woolpert's design team understands how to capture the unique characteristics of each project location while taking into consideration the social, cultural, generational and environmental factors that directly influence the design. We are more than designers—we are an extension of your staff. As such, we understand your critical need for comprehensive designs that are not only efficient today, but also boast the long-term sustainability necessary to accommodate future generations.

*Inspired by the
desire to enhance
the quality of
life, our parks
and recreation
designs promote
community,
sustainability and
efficiency.*

WOOLPERT

ARCHITECTURE | ENGINEERING | GEOSPATIAL

From initial planning projects with the Olmsted Brothers in the early 1900s to master-planned communities of the 2000s, Woolpert has built a solid history of significant planning and design experience. Through this experience, we have acquired a thorough understanding of the complex procedures required for the successful planning and implementation of a park/recreation project. We combine professional expertise with expansive resources to deliver innovative solutions. From architecture, engineering and planning to water resources, GIS, surveying and transportation, our specialists collaborate to provide clients with the unique solutions their projects demand. This integrated approach enables us to partner with you from the earliest study and planning stages of your project through design, project completion and facility operation and maintenance.

Throughout all stages of a project, Woolpert is committed to maximizing your resources. Established working relationships with local organizations enable us to efficiently pursue available funding. Additionally, our LEED®-certified professionals create viable environments by incorporating sustainability principles into our designs to reduce long-term energy costs and maintenance needs. We even offer vision planning as a cost-effective standalone service to help you identify future land use and design opportunities for your community without long-term financial commitments.

Woolpert has provided comprehensive planning and design services to local, regional, federal and private-sector clients throughout the United States on over 1,500 parks and recreation projects. Our combination of experience and comprehensive services provides you with the confidence you need to support and build on your community's quality of life.
