

Higher Education Services

For over 100 years, we've been providing professional services to clients around the world, including more than the last 35 years working closely with universities to implement high-quality design and master planning services—many of them for repeat clients. Over this time, we've partnered with more than 150 universities, creating dynamic living-learning environments. We work to preserve and highlight the history of the campus while creating high-tech educational facilities and some of the most sought-after housing on campus. And our award-winning athletic facility designs help our clients create NCAA-caliber experiences for students and their families.

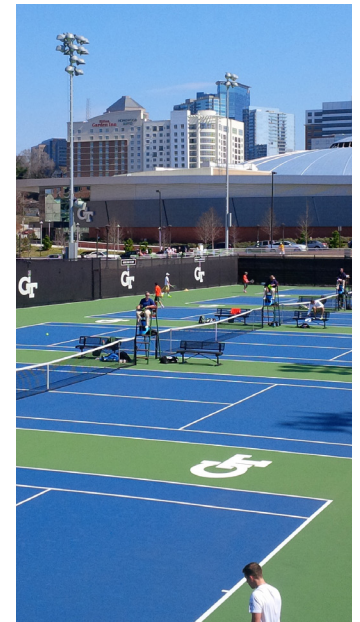

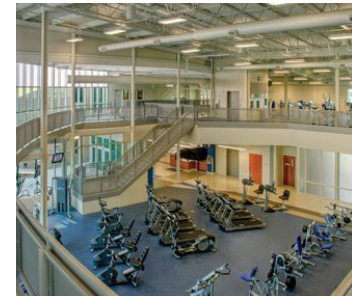

See the back for our areas of focus and images from some of our more recent projects. Contact us today to learn how we can help improve your campus.

Our services include:

- Architecture
- Landscape Architecture
- Campus Master Planning
- Site/Civil Engineering
- MEP/Structural Engineering
- Utility Engineering
- Resiliency Planning

WOOLPERT
ARCHITECTURE | ENGINEERING | GEOSPATIAL

“Woolpert was easily accessible ... Their rapid response to construction issues and inquiries quickly resolved issues and kept the project on schedule. All Woolpert assets were made available to Georgia Tech and the construction manager. I would recommend Woolpert’s services, unquestionably.”

Alfred Dolder
Professional Advisor,
Georgia Institute of Technology
(Ken Byers Tennis Center Project)
