

EXPLORE WHAT'S POSSIBLE WITH GOOGLE MAPS

News and Information

200 million
places in the world

Build with comprehensive, global points of interest data.

25 million
updates daily

Count on accurate, real-time location information.

1 billion
monthly active users

Scale confidently, backed by our infrastructure.

Locations

Get accurate locations for address data with **Geocoding API**. Search for businesses, landmarks and more with **Places API**.

Custom Map Style

Change the look and feel of maps to match your brand or make your visualizations pop by customizing the display of roads, natural features, labels and more in **static and dynamic maps**.

Context

Show road maps and satellite imagery in **static and dynamic maps**. Put users on the ground and tour inside buildings with **StreetView API**.

Data Validation

Overlay vector data as KML or GeoJSON layers, integrate custom tile layers and use advanced techniques such as heatmaps and clustering in **JavaScript API**.
