

# Contracting Vehicles

One of the biggest challenges for contracting work in the federal government is the availability of a contracting vehicle or contracting capacity for a federal agency to utilize when a need is defined. These contracting vehicles provide agencies with access to Woolpert's multidisciplinary services for federal work, thus expediting lengthy contracting processes. Woolpert has been awarded a number of contracting vehicles, both indefinite delivery, indefinite quantity (IDIQ) and indefinite delivery contract (IDC). Your federal agency now has the opportunity to work through projects with the appropriate funding in a timely manner, using Woolpert's contracting vehicles.

Woolpert's contracting vehicles are offered through a number of federal agencies, encompass many geographies and cover a diversity of services including master planning, aerial photography, surveying and design. A comprehensive list of our current contracting vehicles can be found on the reverse side.

We establish connections between federal agencies and the resources necessary to initiate projects.
